Catalyst.NEJM.org : Search Result health care

ADVANCED SEARCH

The screenshot shows the search results for 'health care' on the Catalyst.NEJM.org website. At the top, there are buttons for 'FILTERS' (purple), 'ADVANCED SEARCH' (blue), and a search bar placeholder '검색 결과 저장' (Search results save). Below the search bar, it says '1-20 OF 1786 RESULTS' and has a red box around a bookmark icon. To the right is a sidebar titled '결과 나열 방법' (Result sorting method) with options: 'MOST RELEVANT' (selected, highlighted with a purple bar), 'NEWEST', 'OLDEST', and 'MOST CITED'. The main content area shows a list of results, with the first one highlighted in red. The first result is titled 'Investing in Health Care Management: Training Leaders to Transform Care Delivery in China' by H. Xiao, F. Wang, and E.J. Rubin, published in NEJM Catal Innov Care Deliv 2024;5(s1). The bottom of the page shows 'SUPPLEMENTAL ISSUE | VOL. 5 NO. S1 | DEC 06, 2024 | FREE'.

Outcomes That Matter to Patients: ICHOM as a Catalyst for Value-Based Care

Authors: Jennifer Bright, MPA, Kevin Wake, Mary Lynch Witkowski, MD, MBA, Daphne Psacharopoulos, MBA, Jamie Heywood, SB, Martin Ingvar, MD, PhD, and Stefan Larsson, MD, PhD [Author Info & Affiliations](#)

Published March 19, 2025 | NEJM Catal Innov Care Deliv 2025;6(4) | [VOL. 6 NO. 4](#) | [Copyright © 2025](#)

Abstract

As the burden of chronic conditions increases worldwide, stretching human and financial resources to the limit, the need for value-based care is clear. Formed in 2012, the International Consortium for Health Outcomes Measurement (ICHOM) has established a global community of more than 1,200 clinical, research, and patient experts in over 60 countries to standardize and promote patient-centered outcomes measurement as a universal benchmark for health and value. Its 46 published standards cover 60% of the global burden of disease. Achieving value-based health systems requires aligning payment models, provider networks, digital infrastructure, policies, and regulations around shared patient-centered goals. Standardized outcome measures and transparency are foundational for this realignment. ICHOM's platform offers the world's most comprehensive solution to the measurement of patient outcomes, grounded in science and lived experience. To enable the scaling of successful local projects into broadly sustainable systemic improvements, ICHOM has identified three strategic objectives for its next decade: to expand the community of practice; strengthen change programs; and analyze, learn, and share for impact. ICHOM plans to deliver on these objectives through meetings, partnerships, and networking; offer methodological advice and technical support, as well as accreditation services; and establish and facilitate global learning networks through independent assessment of results.

Catalyst.NEJM.org : Supplemental Issue

Supplemental Issue: Health Care Delivery in China

Supplemental Issue 소개

In 2023, *NEJM Catalyst* and Jiahui Medical Research & Education Group (J-Med) launched a multiyear collaboration designed to highlight and promote advances in the delivery of health care in China. Content is published throughout each year of the collaboration, culminating in a sponsored supplemental issue of the *NEJM Catalyst Innovations in Care Delivery* journal at the end of the year.

Key areas of interest for the sponsored supplemental issue include safety, quality, efficiency, patient experience, and workforce issues. The editors of *NEJM Catalyst* invite submissions of expert articles or case studies that reflect practical and applicable examples of advances in health care delivery in China.

Mental Health Care in Crisis: What Clinicians and Leaders Need to Know

March 14, 2025

1:00 AM - 2:45 AM GMT+9

이벤트 설명

The rise in patient demand for mental and behavioral health services since the Covid-19 pandemic has proven difficult for many health care organizations, particularly as they also struggle with reimbursement issues and staffing shortages.

The good news is that with care redesign and digital innovation, improvements in mental and behavioral health care are within reach. In this virtual event, our panel of experts – from provider and payer organizations as well as established health systems and startups with new approaches – will discuss how to make the progress needed to help more patients with mental health conditions and substance use disorders.

Discover:

Optimized ways to provide care – including outpatient therapy and different types of medication – to many patients
How to rethink reimbursement models
Why value-based payment must be part of the solution

Catalyst.NEJM.org : Insights Council

Insights Council

Insights Council 소개

The NEJM Catalyst Insights Council is a qualified group of executives, clinical leaders, and clinicians at organizations worldwide who are directly involved in health care delivery. Council members participate in a 5-minute monthly survey about current issues and topics transforming health care. The survey results are published as Insights Reports and Survey Snapshots in *NEJM Catalyst Innovations in Care Delivery* (a subscription-only digital journal) and include summary findings, expert analysis, and commentary from thought leaders. These reports provide valuable and influential assessments on the pulse of health care today, as well as how to change it for the better. Now including global data.

참여 방법

Join the Council

As a member you will:

- Have a voice in improving health care delivery
- Share your expertise about current issues and topics
- Benchmark your experience against your peers
- Gain a firsthand view into crucial health care developments
- Receive free access to Insights Reports and Survey Snapshots

Your privacy is ensured, and no personally identifiable information is shared.

VALUE-BASED CARE THEME ISSUE: A survey of NEJM Catalyst Insights Council members finds growing adoption of value-based care models globally, particularly performance-based payment and shared savings and risk.

Catalyst.NEJM.org : Topics

Topics

주요 토픽 8종

Alternative Payment Models

Financial approaches such as bundled payments and other APMs that reward providers for cost-efficient quality care can align stakeholders and improve overall value.

Analytics and Outcomes

Data and analytics are a necessary means for clinicians, clinical leaders, and executives to transform health care delivery outcomes.

Culture of Health

Cultivating good health and well-being is as important to patients as it is within health care organizations. Building a culture of health depends on the collaboration between communities, businesses, and health care organizations.

Health Technology

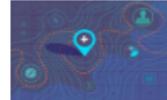

Advances in technology, especially information technology, have the potential to revolutionize health care delivery yet are not a panacea.

Health Care Leadership

Leaders of health care organizations must guide a culture of high performance and camaraderie in a time of change.

Market Landscape

In the changing marketplace of health care, new entrants and combinations are remaking the marketplace of health care, while trends such as consumer transparency are driving new modes of doing business.

New Models of Care

Changes in medicine, technology, financing, and patient demands require that care providers constantly reinvent the design and performance of their systems.

Patient-Centered Care

A focus on the patient is the cornerstone of health care, yet the patient voice remains elusive.
